## RECYCLABLE CORRUGATED FIBER PALLETS

### ECOLOGICAL, LIGHTWEIGHT, DURABLE AND TIDY

Corrugated fiber pallets are an innovative alternative for wooden, plastic and styrofoam pallets. We manufacture approximately 300.000 fiber pallets each year for the needs of diverse industries and commerce.

Fiber pallet is suitable for many applications. It's easy and trouble-free to use in export shippings as it doesn't need any phytosanitary markings or certificates. Fiber pallets are fully ISPM-15 standard (IPPC) compliant.

The pallets also give image value for your business. With easily recyclable fiber pallets you can show your environmental values.

**PRODUCTION**

- Made from 80% recycled materials
- Fiber pallets are manufactured in Finland
- Materials are 90% Finnish-made
- Fiber pallet is recycled back to raw materials after it's life cycle

**CUSTOMER**

- Fiber pallets take less storage space. Storing pallets is more economical.
- Lightweight, easy and safe to handle
- Hygienic enough even for the medical industry
- Durable (tested by VTT Technical Research Centre of Finland and KCL)
- Completely even deck: no splinters. Less damage to shipped products and safer to handle.
- Suitable for automated packaging and many different conveyor types.

**SHIPPING**

- Fiber pallet endures moisture and water splashes (weather-proof glue)
- Suitable for export (ISPM-15 compliant)
- Lightweight, cheaper air cargo
- Absorbs shocks and vibration

**END-USER**

- Clean and tidy appearance
- Used pallets are light and easy to handle
- Can be recycled using the normal cardboard recycling system
- Recycling network is readily available
- Used pallet takes no extra space in storage rooms or loading docks
